

# MIMS report

## Moscow International Motor Show

The 11th Moscow International Motor Show (MIMS) 2007 was held from the 29th August to the 2nd September at Crocus Expo exhibition centre in Moscow, Russia.

It was the first time for GMB to participate at a motor show in Russia. As you know, Russia has been achieving strong economic growth since 1999, so we must consider it as one of the most important markets for business development.

The show hosted around eight hundred companies from thirty countries in total. At this show, GMB Corporation Japan and GMB Korea Corporation participated jointly to exhibit our products at a common booth.

The booth covered an area of forty five square meters, and was located at the corner of the passage, which was convenient to find for our many visitors.

We exhibited not only our main current product ranges such as water pump and universal joint but also our future strategic items such as electronic water pump, electro magnetic fan clutch in the show-cases which fronted our booth.

The guests who visited our booth were mainly from Russia but many other countries - Germany Turkey, Finland, Ukraine, Kazakhstan, UAE, Italy, etc. were also represented.

The number of the people who visited was in excess of one hundred fifty, and we believe they enjoyed their visit and also perceived our Japanese high quality engineering.

We intend to take part in similar shows in emerging markets in the future. If you or your customers can suggest suitable shows, GMB is prepared to consider a joint contribution or other suitable support. We look forward to hearing from you and hope we can join together to promote our mutual business interests.

We would like to express our heartfelt thanks to the customers who visited our booth during this motor show.

**Большое спасибо!**
