

GMB Wins YAMADA'S Award For Good Quality This Past 3 Years.

The president of the Yamada Manufacturing Co., Ltd. Mr. Kitamoto and Purchase Manager Mr. Tomaru visited GMB Head Office on April 11.

GMB achieved zero defect on supply of steering joint and the award for this level of excellence was presented by President Mr. Kitamoto to GMB Vice-President Mr. Mizutani.

- In order to attain zero defect, activity was required in the construction of the following management systems.
- I : The quality control system which monitors every process to eliminate errors.
 - II : The production system which runs on a lean stock basis.
 - III : The continuous improvement of all activities from the very start.

GMB supplied in excess of 3 million pieces of steering joint to the Yamada Manufacturing Co., Ltd. in 2007 focusing on supply to Honda as a steering manufacturer. Totally 830,000 pieces/month are supplied via Tier1 makers to all automakers and industrial machine makers, and further production increase requests are coming from Tier1 makers to GMB as a result of our excellence in QCD as proved by the Yamada award.

We will continue sending better quality so that the same report can be performed next year!
