

**May I wish all customers to
GMB a Happy New year.**

Kazuo Namboku
President

At the start of this new decade of 2010, we will face our responsibility in social upheaval to the changing world.

Firstly, we will develop the concept of the Corporate Social Responsibility in the global community and ask our customer in all market to engage with us in the venture. We hope you will collaborate enthusiastically with us.

Secondly, we take our impact on the environment seriously. So we will be obtaining ISO14001 certification to reduce environmental damage.

At the end of 2009, the economy seemed to show a hint of recovery and I would like to emphasize that every employee of GMB is totally committed to helping your continued success in the spirit of our slogan.

2010 New Year's message to our esteemed customers and friends from Sales HQ.

Speed in thinking and action is what we will emphasize in the process of 2010 business development.

GMB is not yet a leader of the industry but we have great experience in the worldwide market for generations. Let's share the burden of the market pressures and cope with the difficult task as one team in order to reach our mutual goal.

We hope to entertain new year's celebration again with both old and new friends together next year.

Shuji Kuwamura

Executive officer Deputy Chief, Sales HQ.

NEW DEVELOPMENT

Quality Talks

*Not all parts perform the same.
The difference comes from the Quality.
That's what GMB stands for.*
